## **DETAILED ACTION**

### ***Priority***

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Germany on December 29, 2000. It is noted, however, that applicant has not filed a certified copy of the German application as required by 35 U.S.C. 119(b).

### ***Specification***

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

#### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (f) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).

Art Unit: 3637

- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 9 & 12-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In Claim 9, the phrase "is arranged height-adjustably above a pedestal recess set back on said housing" is unclear and confusing as presently recited. Consequently, the remaining claims are rejected because they are dependent upon an indefinite claim.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:  
A person shall be entitled to a patent unless –  
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
5. Claims 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by WIPO publication 98/33426 [known hereafter as WO`426]. WO`426 (see figures) teaches of a dishwashing machine comprising: a dishwashing machine housing (fig. 8) having an internal height; a pair of retractable pull-out upper and lower containers (202a, 202b) mounted one above the other in the housing; each of the containers containing a

Art Unit: 3637

dishwashing system; and the containers have a total height less than the internal height of the housing as readily apparent to the examiner. The lower container capable of being arranged adjustably above a recess on the housing as is known in the art. The containers having different heights with the upper container having a height greater than the height of the lower container (fig. 7).

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 426 in view of German publication 3501364 [known hereafter as DE 364].

WO 426 teaches applicant's inventive claimed structure as disclosed above, but does not show the housing as including two pairs of adjustable feet. DE 364 (figures 1-3) is cited as an evidence reference to show that it was known in the art to incorporate two pairs of adjustable feet (2) to an appliance housing. Accordingly, the position is taken that it would have been obvious to one having ordinary skill in the art at the time the invention was made to utilize four adjustable feet (two in the front and two in the rear) as taught by DE 364 because this arrangement provides the means to establish a level appliance housing and serves to compensate for minor irregularities [height differences] that may be present in the supporting floor surface.

Art Unit: 3637

**Conclusion**

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sargeant et al., German publication 3531095, Bergeson, Query and Long describe leveling means for appliance housings.
